

# high five

Kathy Najimy, a star of *Sister Act II*, gives us her hand—

and our expert palmist, **Mark Seltman**, gives her the future

**the big picture:** This gifted comedic actress excels at her work and even greater success is headed her way, but not without a few rough patches over losing weight and learning to let go of old habits, friends and lovers.

**apollo line:** Major stardom lies ahead, and she will revel in its opportunities. There's potential, though, for ending up on the cover of the *National Enquirer* six years from now if she hooks up with a married man.

**the thumb:** Strong and well-formed. Shows great will, determination and a serious stubborn streak. She talks sometimes before she thinks, but doesn't want to hurt anyone.

**mount of venus:** Passionate. Friendly and very sociable, but she is careful about who she lets get close. Musically talented. Loves kids, hopes to have some. Fond of worldly pleasures, including gourmet treats.

**jupiter finger:** This is her dominant finger and holds the key to her personality. It shows she's ambitious, self-confident and her career is paramount. She must rule the roost. She hates criticism.

**mercury finger:** Excellent communicator. Money doesn't drive her, though she will be making plenty of it. Strongly attached to her family, but there are times when it's not *The Waltons*.

**marriage line:** She's had relationships, but has yet to meet her soul mate. Hang on, though, it'll happen, but don't expect a serious commitment for a few years.

**heart line:** A romantic. Craves candlelight and music. When in love, sees her sweethearts as she'd like them to be, not as they really are. Has difficulty verbalizing her feelings; is better at demonstrating affection.

**fate line:** Hard-working and able to focus with great concentration on what she wants. She faces a major transition period as she moves to top billing from supporting roles.

**life line:** Lives for her work and her relationships. Success increases her impulse to nurture.
